Education

Manchester Metropolitan University

Master of Science in Computer Science

Sep 2024 - Sep 2025

Grade: Distinction

The University of Law

LLB (Hons) Law

Sep 2019 - Jun 2022

Grade: 2:1

Work Experience

The Co-operative Bank

Technical Analyst

Sep 2022 – Present

Manchester, UK (Hybrid)

- Developed **Python**, **SQL**, and **PowerShell** tooling to automate workflows across digital banking, payments, and cards platforms; integrated with **Azure AD**, **RBAC**, and **ServiceNow** for authentication and fraud-detection services, cutting repeat incidents by **25%** in a regulated financial services environment
- Owned reliability of **10+** cloud-hosted production applications; diagnosed integration defects across **HTTP/API**, **TCP/IP**, and **DNS** dependencies using **Azure Monitor**, **Grafana**, and **KQL**, sustaining **99.5%** uptime and reducing mean resolution time by **30%**
- Automated **ServiceNow** escalation and **NSG** access workflows for **IAM** and cloud security issues; partnered with engineering teams to resolve production **HTTP/API** integration failures across payment and fraud-detection services, reducing manual triage across the platform

Peltarion

Software Engineer

April 2021 – Jul 2022

London, UK (Hybrid)

- Owned end-to-end development of a production-grade service using **AWS CDK (TypeScript)** and **Java-based AWS Lambda** functions, automating manual campaign management and scaling to **6M+** emails/day
- Launched with **AWS CloudWatch** dashboards used daily by enterprise clients, cutting costs by **£8K+/month** and saving **80+** hours of manual work each week
- Integrated with live systems processing **40M+** events/day by connecting **AWS SNS** and **SQS** to internal services and persisting artifacts in **AWS S3**, reducing campaign processing time by **23%**

KPMG

Software Engineer

Jan 2020 – Sep 2020

Madrid, Spain (Remote)

- Led development of a Cloud Security Posture Management tool using **Python Flask** REST APIs, **PowerShell** scripting, multi-cloud **SDKs**, **JSON** metadata, and **MySQL** database, deployed for **10+** Fortune 500 clients, saving **200+** hours/month in manual cloud audit effort
- Developed **13** Python Azure cloud audit bots for KPMG's Intelligent Automation Platform to automate control validation and compliance checks for admin access, password policies, **CIS**, **NIST**, and **CSA CCM** baselines, used globally by **8** KPMG member firms
- Orchestrated cloud pipeline automation for Active Directory group creation using **Terraform**, **Bash**, **Docker** on **Kubernetes**, with **GitLab + Jenkins** CI/CD for automated deployment, reducing cloud operation costs by **15%**
- Resolved **120+** IAM, IaC, and microservice issues on **ServiceNow** by automating **Splunk**-triggered tickets, cutting turnaround time by **70%**

Projects

On-Orbit Collision Predictor | [Source Code](#)

Django | **MATLAB** | **Next.js**

- Built an on-orbit collision prediction platform using **Django**, **MATLAB**, and **Next.js**, resulting in end-to-end ingestion and processing of **58** CDM attributes with persisted prediction reports, role-based access, and admin usage monitoring

MyHealthPal | [Source Code](#)

TensorFlow | **Spring Boot** | **Next.js**

- Built an AI virtual care platform using **Next.js**, **Spring Boot**, **Flask**, **PostgreSQL**, and **TensorFlow**, resulting in OpenAI-powered symptom assessment plus a sentiment model trained on **1.6M** tweets at **~94%** accuracy for therapist support

Leadership Experience

Google Developer Student Club

President

Jan 2024 – May 2024

Remote

- Led a core team to plan and execute monthly technical events; hosted a **Gemini** workshop with Google ML Engineer **Shilpa Kancharla** covering **RAG**, **Embeddings**, and **Vector Databases**, alongside virtual **GitHub** and **LinkedIn** workshops to upskill young professionals

Technical Skills

Languages: JavaScript, TypeScript, Python, Java, Go, SQL, C, HTML5, CSS

Developer Tools: AWS (Lambda, CDK, S3, SNS, SQS), Azure, Google Cloud Platform, Git, Docker, Kubernetes, Terraform, GitHub Actions, Linux, Postman, Prisma, Supabase, Firebase

Libraries/Frameworks: Spring Boot, Flask, Django, Node.js, React, Next.js, REST APIs, PostgreSQL, MySQL, MongoDB, NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, LangChain, RAG
